 @tessierherefords

Welcome to the 2025 Tessier Herefords 8th annual production sale!

Wow what a whirlwind of a year it has been! It seems like it was just yesterday we were dropping the gavel on the last lot, but here we are again in full sale prep mode. This summer was a challenge, when the rain shut off in July; we just tried to keep grass in front of these cows. All in all we were happy to be able to get through the summer grazing season without any fires or dust pneumonia; what blessing that was.

Looking through the offering this year you will find some new genetics. We are extremely excited to offer the first J047 Count Down calves and they didn't miss a mark- with every bull calf making the sale and all the heifers making the top end of the replacement pen. We also brought in Churchill Red Thunder and NJW Steadfast as new AI genetics to compliment our deep set of Frontier cows and we are impressed with the results! Another thing you will notice is our lighter offering of yearling bulls. We are starting to transition our sale into a 2 year old program to better supply our customers with a more slow developed set of herd bulls that will stand the test of time and cover more cows.

Another sale feature we are excited to start offering is a select set of elite registered and commercial females; all produced from our genetics. The 5 registered females are sure hard to part with, but we decided if we were going to offer a set of females they were going to be top end. These females are very maternal focused, with many of their dams putting bulls back in the sale, or heifers in the replacement pen. You can buy any of these females with confidence knowing if they weren't in this sale they would be on our summer range getting bred.

If you have any questions about the offering or would like to see the bulls or females, feel free to stop out any time. The coffee is always on this time of year and we enjoy showing the dams behind these genetics and getting to know about your operation so we can better point out the genetics we feel will work for you. Thank you for taking the time to evaluate our genetics and we hope to see your sale day! *Zach, Larissa, Hadley & Hayden Tessier*

2431 is a short marked, goggle eyed, smooth shouldered type of bull that is packed with maternal performance.

BRAND THE BOARD

We would like to invite our bull buyers to bring their branding irons and add their brand to the board after the DEMAND THE BRAND SALE.

Lot 18 is a long thick made bull that carries himself very well. His dam has but several heifers back into our herd.

JE, Presley, Jude, Dak & Wes Cooley

The Cooley Ranch was established 1956 by my grandfather Glenn Cooley. I am now the third generation and currently raising the fourth with my wife Presley. We have three boys; Jude (4), Dak (2), and Wes (1). We have been raising commercial bulls for twelve years. We select sires that complement our herd and are always aiming to improve.

2466 is extremely hard to part with; if we didn't have so many embryos in the tank of this mating, we wouldn't be offering Dream for sale. 2466 will positively impact any program that she goes to. The consistency of this mating is bar none the best we've ever seen. Dream has added length, a soggy mid-line that screams bull producer. Retaining one right to flush at buyer's convenience and seller's expense.

Lot 21 and 22 are maternal half sisters going back to the great Red Baron. 2428 has a level top line, a sleek clean front and that added pigment that everyboy's looking for. 919G is already made a great impression in our program in her short life so far.

Cinderella is long made and short marked. This is the first Count Down daughter to ever be offered. As you can tell by her picture, Count Down is going to have a huge impact on our program, as we AI'd 50 cows to him this spring. If we're going to offer females, we're going to bring our best to the sale. Have Cinderella on your short list on sale day.

2403 Miss Maybelline is some of the first Sunrise offering in the country. This female is dark cherry red, double goggle eyed, and has extreme calving ease bred in to her. 2403 has a great cow family behind her that takes the guess work out of breeding cattle.

Dr Quinn is a moderate framed, square built little female that is quite a bit younger than the rest of the offering, but is catching up quickly. The maternal side on this female is backed by years of Keith Rockeman breeding. We are proud to offer this female for your program's future.

Tessier BWF heifers

These heifers are the product of using cooley bulls on our registered cows as clean ups. This pen of heifers has produced extremely well and bring the best of both programs to the table.

26

Andes BWF/RWF heifers

We asked RD if we could get our hands on any Count Down females for the sale and he decided to let some go. This pen will consist of 10 RWF Count Down open heifers and 10 Black and BWF face open heifers they are going to really pack the pounds on this summer on grass and make front end females.

This year Kody and Emily Mintyala got the opportunity to go manage a big ranch in Idaho. We can't thank them enough for all their hard work last year and wish them well in Idaho. This year we had the ability to hire Gavin Leppert and he has hit the ground running. Gavin runs the day to day operations while Zach is at work. We are extremely grateful to have Gavin and his fiancée Betsy as a part of our team. Thank you Gavin and Kody for all your contributions to Tessier Herefords.
